March 2026

General CT™ range spearheads Bendix's rotor growth

Bendix's share of the disc brake rotor aftermarket continues to grow, led by increasing coverage of the revolutionary General CT™ range, along with strong ongoing support of favourites including Euro+™ and Ultimate 4WD™ rotors.

Bendix now offers rotors to suit up to 83 per cent of passenger vehicles* on local roads, with the range regularly expanding to cover more late model vehicles including many new Chinese makes.

While Bendix's rotor offering was well established for European marques with Euro+™ and for four-wheel drives through the Ultimate 4WD™ range – particularly as an upgrade option – it was the release of the General CT™ line-up in 2024 targeting 'everyday' non-Euro passenger vehicles,

that saw widespread adoption by the industry thanks to its many benefits.

“Bendix now offers rotors to suit up to 83 per cent of passenger vehicles* on local roads”

The General CT™ difference

The award-winning** General CT™ disc brake rotor range features high quality metallurgy that's developed for longevity and improved heat dissipation in demanding local conditions and applications.

For easy fitment, the range is also designed to be a direct replacement for OE rotors, meeting or exceeding OE specifications while delivering confidence and peace of mind for both workshops and vehicle owners.

And of course, General CT™ features Bendix's market-first SwiftCheck™ innovation, a machined feature that

General CT™ Disc Brake Rotors' market-first SwiftCheck™ innovation provides a fast and convenient visual indicator of rotor wear.

consists of tapered circular grooves on the rotor surface that narrow and disappear progressively as the rotor is worn, providing a fast and convenient visual indicator of rotor wear.

For added versatility, General CT™ rotors offer strong braking performance with all Bendix disc brake pads.

Bendix will continue to expand both its General CT™ disc brake rotor and brake pad ranges throughout 2026.

*2005 to 2025 models. **2024 Most Innovative New Aftermarket Product (Parts), Australian Auto Aftermarket Expo.
