Special information and disclaimer for fitting the Bendix Big Brake Upgrade – Drum to Disc conversion.

Congratulations on the purchase of your Bendix Big Brake Upgrade – Drum to Disc conversion kit.

We recommend that a Bendix authorised installer is engaged to fit this kit to your vehicle as they have been trained on the installation requirements, have access to all special tools required and understand all aspects on ensuring that your vehicle is legal, with all engineering inspection and/or mod plate registrations are completed for your state or territory.

An overview of what is required can be seen on this short video:

- <https://youtu.be/9W6sBsLkdUc>

- The fitment of this kit will require special tools
- For NSW, VIC, ACT, SA and TAS, the installation of the kit will require an engineering tech inspection and the installation of a mod plate which is lodged with the relevant state registration authority.
- For QLD and WA, this kit has been registered for an LG1 certificate with relevant state registration authority
- Failure to obtain vehicle compliance may void your insurance and the vehicle could be considered unroadworthy.
- It is the vehicle operator's responsibility to ensure that the vehicle is compliant, however a Bendix Authorized installer will ensure that all aspects are complete at the completion of the installation.

If you are an authorised automotive technician with access to the correct tools to fit this kit, you can apply to Bendix to become a preferred installer. Bendix will then make available to you additional fitting information required and any supporting ADR Master reports to your nominated engineering signatory to enable vehicle compliance.

FMP Group (Bendix) shall not be responsible for any defects or damage to the product or any vehicle if the product has been altered or improperly installed or misused. Please take the time to read through the installation instructions included and/or take the link to the installation videos produced to assist with the correct fitment of this kit.
