**Precise towing
control that's easily
interchangeable
between tow vehicles,
trailers and caravans.**

**PART NO.
ULTTOWPLUS**

Plug 'n' Play

With its clever 'Plug 'n' Play' design and simple self-installation, Bendix's new Ultimate TowTM Portable Electric Brake Controller makes it easy and fast for drivers to move between tow vehicles, trailers and caravans.

Easily interchangeable

Rather than being limited to a single tow vehicle with a fixed brake controller, Bendix's Ultimate TowTM Portable Electric Brake Controller's flexibility allows any vehicle equipped with a towbar to be used with any trailer fitted with electric brakes.

Precise braking control

Controlling braking effort is easy thanks to a simple user interface – with a twist of a dial (clockwise increases braking effort while anticlockwise reduces it), drivers have complete control.

**Fast to connect
– ready to tow in
minutes**

**Easily interchanges
between tow
vehicles**

**Easy-to-use
LCD control
interface**

**Trailer
disconnection
warning**
