

NEW RELEASE BULLETIN

JANUARY 2019

Bendix are pleased to announce the addition of 6 new part numbers to the Protrans Commercial Vehicle Protrans Brake Linings Range.

Protrans brake linings are designed to perform whether you're on the highway, stop and starting, or on tough off-highway conditions. Offering reliability that performs on a range of commercial applications without compromising product life. Lining kits include all the rivets and the correct number of linings to reline the shoe cores.

Packed full of features, Protrans Brake Lining Kits offer:

- Premium Friction Material
- Ease of assembly during replacement
- Cost effective and durable

Friction Rating

Protrans linings are rated FF which means they maintain a high nominal friction level (0.35-0.45Mu) through the normal and high braking temperatures. The first letter of the code represents the "Normal" coefficient where temperatures range from 95°C–205°C. The second letter represents the "High" coefficient, with temperatures ranging from 150°C–350°C.
