HEAVY DUTY™ DISC BRAKE PADS

Bendix Heavy Duty™ pads belong on every hardworking ute, van and pick-up in the country.

- Better performance & better mileage
- Lasts up to twice as long as general-purpose brake pads in extreme operating condition
- For hard working vehicles

INFO!**

Whether it's the demands of city driving, heavy towing or the hard grind of construction sites, Bendix Heavy Duty™ is the answer. The technologies used in Bendix Heavy Duty™ deliver a brake pad with better performance and better mileage. Bendix Heavy Duty™ also lasts up to twice as long as all-purpose brake pads in hardworking and high temperature conditions, perfect for hard working vehicles.

- Unique insulation barrier minimises heat transfer
- Cooler operation protects braking system

- No bedding-in is needed, for more efficient installation
- Instant pedal feel from the first brake application

Working longer

LESS DOWNTIME EQUALS MORE PRODUCTIVITY

Using our global technology, Bendix Heavy Duty™ has been specially formulated as a hard working compound that is long lasting without being unduly harsh on rotors.

Developed and tested in the Bendix dynamometer laboratory and on the road, Bendix Heavy Duty™ not only work better but also last longer.

Working cooler

INSULATES BRAKING COMPONENTS FROM EXCESSIVE HEAT

A feature of Bendix Heavy Duty™ pads is the exclusive INSULayer, sandwiched between the backing plate and the friction material. Braking transforms kinetic energy into heat and the INSULayer minimises heat transfer through the backing plate which can result in damage to the caliper and overheating of the brake fluid.

No bedding-in

BENDIX BLUE TITANIUM STRIPE SAVES YOU TIME AND MONEY.

Bendix Blue Titanium Stripe saves you time and money. Blue Titanium Stripe gives instant friction and positive pedal feel, the moment your customers drive out of the workshop.

The high friction titanium coating on the brake pad surface mates quickly to the rotor when brakes are first applied and full braking performance is achieved in a few stops. Normal bedding-in procedure is a minimum of 30 stops. That's 10 minutes of your time that could be better spent on other jobs!

BLUE TITANIUM STRIPE COMPARISON

HEAVY DUTY™ DISC BRAKE PADS

Working harder

DESIGNED TO EXCELS IN TOUGH CONDITIONS AND APPLICATIONS

More and more fitters are recommending Bendix Heavy Duty™ brake pads to their customers for longer life and high performance in tough conditions.

Whether it's a heavily loaded work ute or a courier van in stop start traffic, Bendix Heavy Duty™ are specially formulated to work under heavy loads and at high temperatures and last up to twice as long as all-purpose standard brake pads.

Smooth and quiet driving

BENDIX NOISE ABSORBING SHIMS ENSURE AN EVEN SMOOTHER RIDE.

Bendix noise absorbing shims are designed to effectively prevent the transmission of vibration and noise from the brake pad by reducing the effect of the dynamic forces generated during braking, for the life of the brake pad.

Why choose Heavy Duty™ Disc Brake Pads?

Features

- INSULayer
- Blue Titanium Stripe
- Noise dampening shims
- Designed for hard working vehicles
- Brake wear indicator

Benefits

- Longer pad life, improved fade and improved rotor life.
- No bedding-in required. Improved pedal feel from the first stop.
- Reduced transmission of vibration and noise from the brake pad.
- Great for towing, courier vans, taxis and heavier vehicles.
- It's now easy to see when to change brake pads.
