Electronic Brake Wear Sensors are an added safety feature on many vehicles used to warn a vehicle's driver when their brake pads are near the end of their service life.

Bendix's range of Electronic Brake Wear Sensors are designed to be a direct OE replacement and cover over 900 applications.

Electronic Brake Wear Sensors are mounted on the brake pad on any combination of the four wheels, and may have sensors on 1 to 4 corners of the vehicle. When the brake pad wears and the Electronic Brake wear sensor makes contact with the rotor, a warning is given, usually in the form of a light on the vehicles dashboard.

Wear sensors are designed to break or complete a circuit as the brake pad wears, and hence are not re-useable and need to be changed whenever the brake pads are replaced or the warning light indicates.

How to determine when to change your brake pad sensors:

- Electronic Brake Wear Sensors should be changed whenever the pads are replaced
- If they have made contact with the rotor they cannot be reused
- Even if they have not made contact they should still be replaced with every pad change
 - Materials become worn during their service life and can affect their functionality
 - To ensure sensor performance throughout the life of the new pads they should be replaced with a new sensor

BRAKE WEAR SENSOR

APPLICATION GUIDE

Improved driving safety for modern vehicles.

OE LOGBOOK SERVICING*

OE LOGBOOK SERVICING

Bendix brake components are appropriate for the purpose intended and if installed by qualified staff, to the vehicle manufacturer's specifications, can be used in logbook servicing.

LEADING TECHNOLOGY HYBRID

LEADING TECHNOLOGY

Bendix technicians are dedicated to building more control, less noise and faster installation into every new product we create.

BEST RANGE WIDEST COVERAGE OF CARS

THE BEST RANGE

Bendix brake pads are designed and manufactured for local conditions. This ensures they are right for your vehicle whether it's an everyday passenger car, an SUV, a high performance car or a load carrying commercial vehicle.
